

Veltyma™

Fungicide

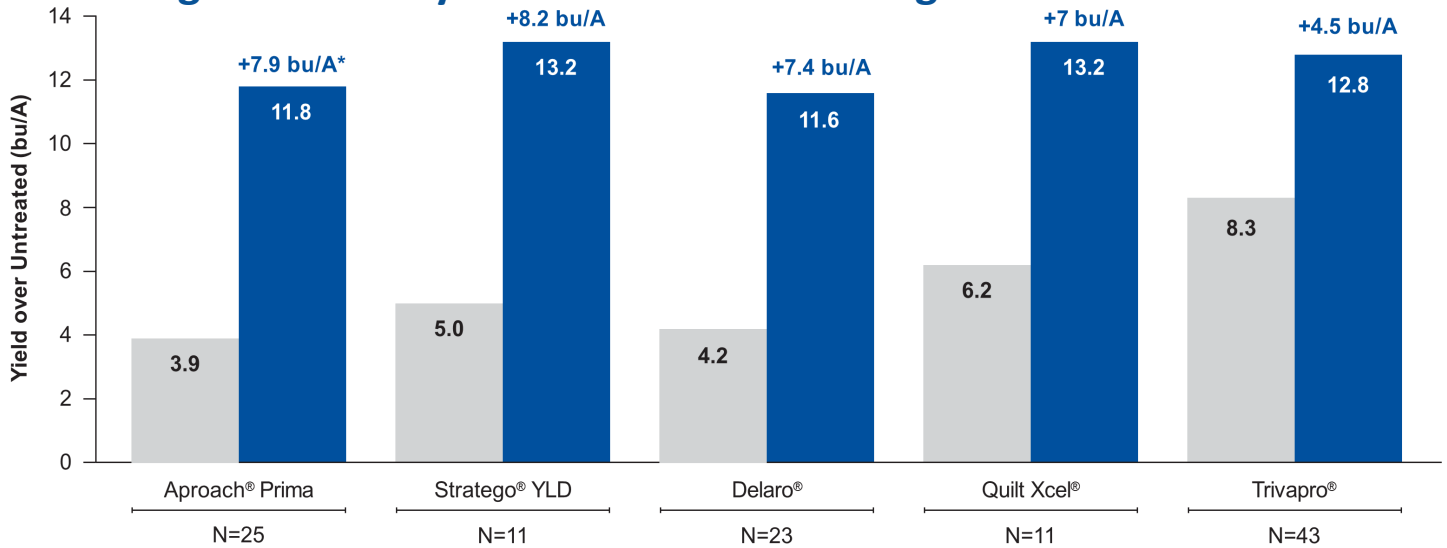

Swift, Simple, Secure

Bringing Innovation To The Corn Market

Introducing Veltyma, the newest BASF fungicide developed with Revysol® and the only Isopropanol Azole in the market. BASF engineered Revysol fungicides have greater affinity to fungi, outstanding efficacy and excellent crop safety.

Veltyma is a pre-mix fungicide that delivers fast acting preventative and post-infection residual disease control for a broad range of crops and diseases. Look for 2019 yield data coming soon and see the difference!

Providing Consistently Healthier Fields and Higher Yields

Grey bar: Competitor
Blue bar: Veltyma Fungicide

Summary of BASF or partially/fully sponsored University or Consultant small-plot replicated trials, 2017-18. Pair-wise comparisons by product with Veltyma fungicide 7 fl oz/A, Aproach Prima 6.8 fl oz/A, Stratego YLD 4 fl oz/A, Delaro 8 fl oz/A, Quilt Xcel 10.5 fl oz/A or Trivapro 13.7 fl oz/A applied to VT-R1 corn. *Yield advantage is bu/A of Veltyma fungicide over the competitive product.
